

## 1. Main Look :

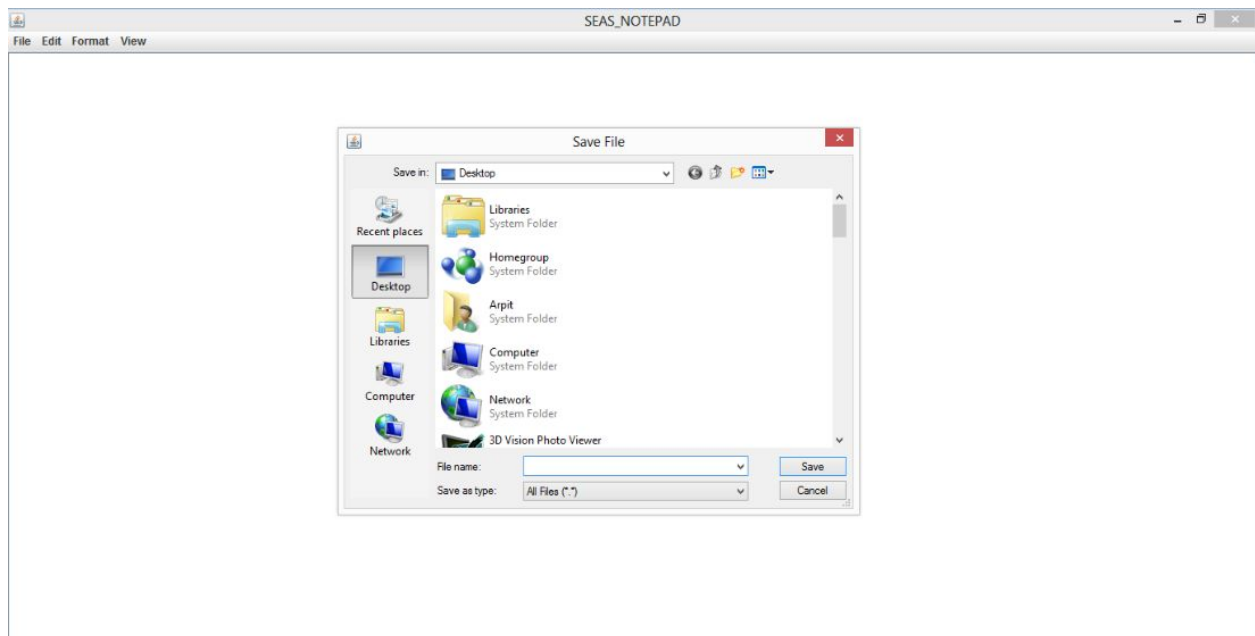

## 2. File Menu :

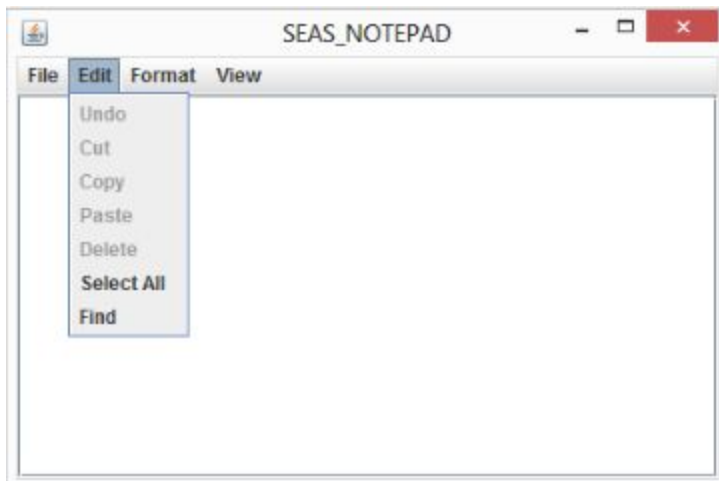

### 3. Open :

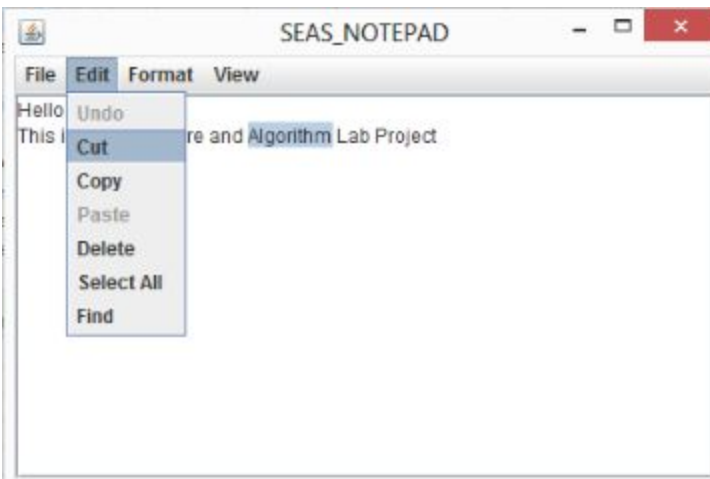

### 4. Save :

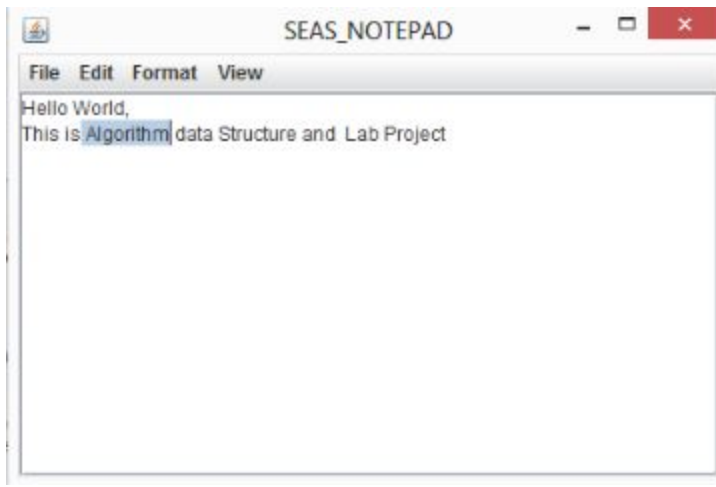

**5. Edit Menu :** Here Undo command is disabled because no such operation is done till now. cut, copy and delete menu items are disabled because text is not selected now. Cut or copy menu item is not performed therefore paste command is not enable.

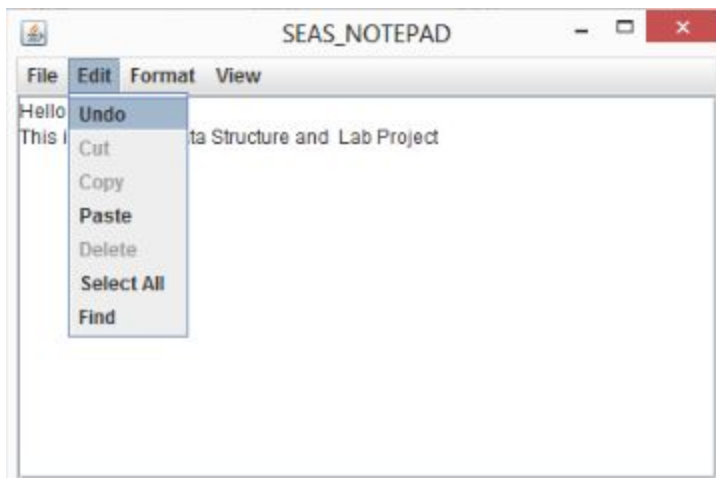

**6. Cut/Copy :** Here “Algorithm” is selected so now we can do cut or copy operation.

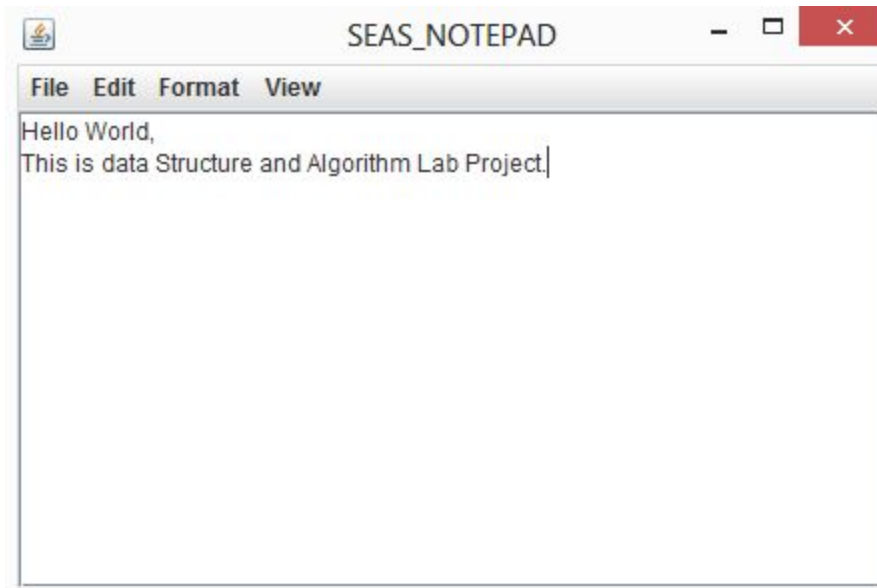

**7. Paste :** Here caret position is between “is” and “data” and we perform paste command so “Algorithm” is now inserted between “is” and “data”.

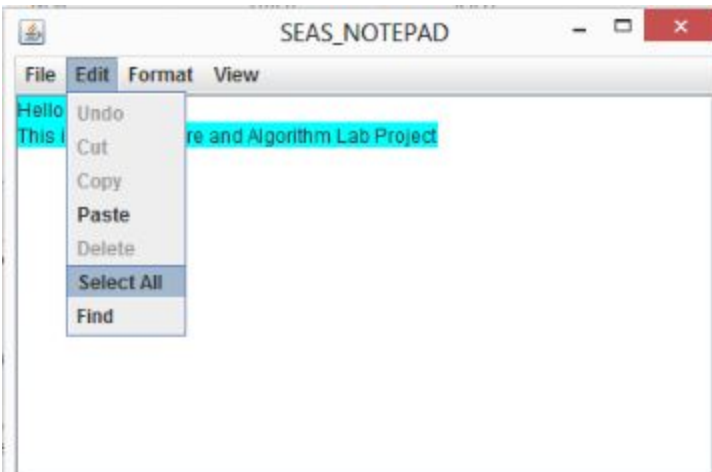

**8. Undo :** Till now we performed 2 operation cut/copy and paste so now we can do undo operation 2 times.

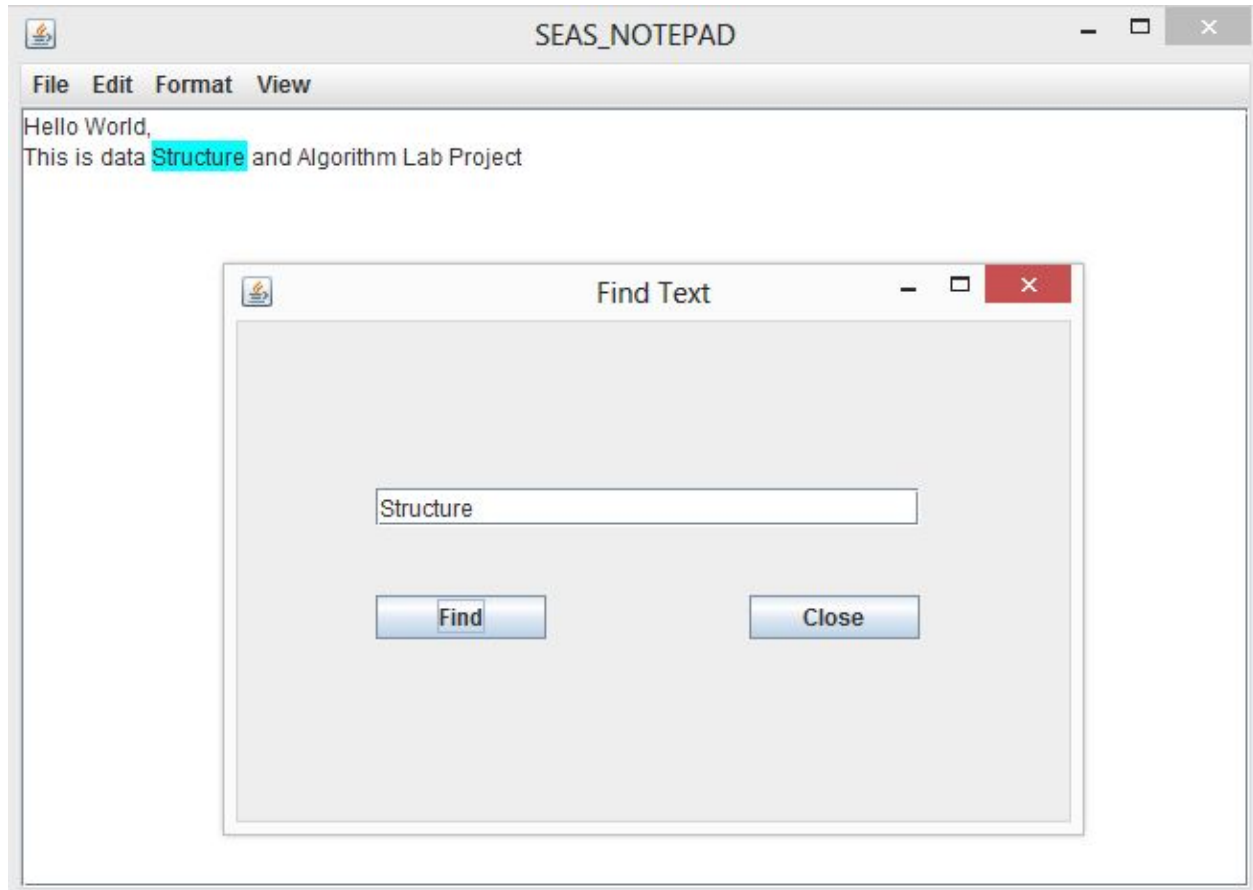

After doing undo 2 times. We get our starting text back.

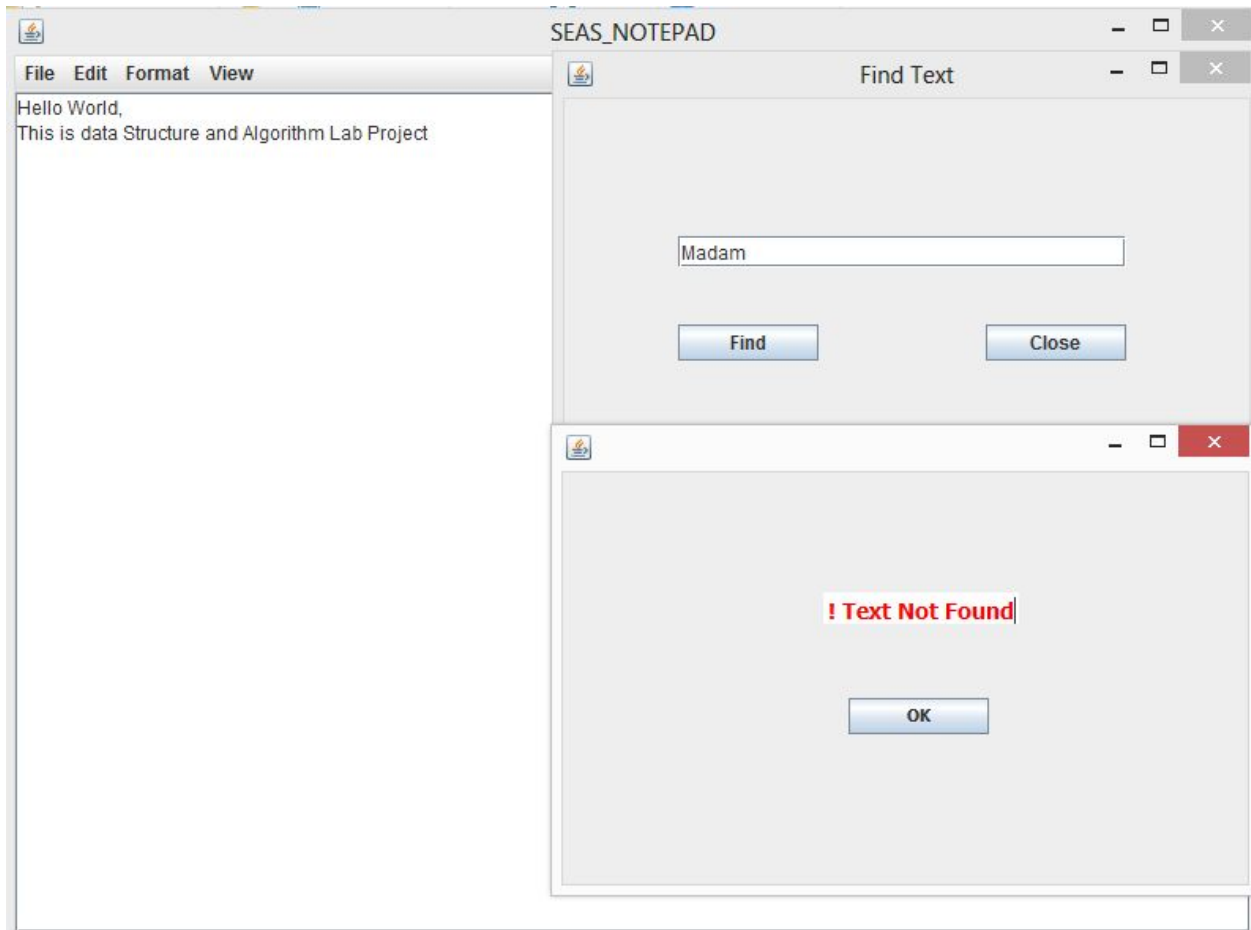

**9. Select All :** After doing “Select All” command All text are selected.

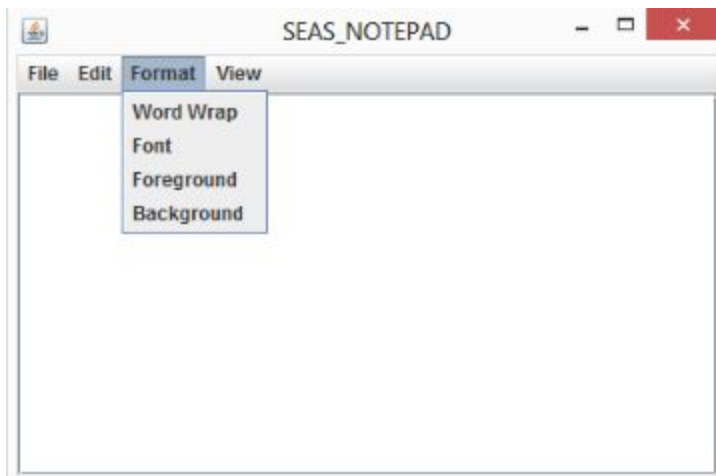

**10. Find:** When we click on find command new window is appear “Find Text”. As we see here we find “Structure” and it is highlighted into text area.

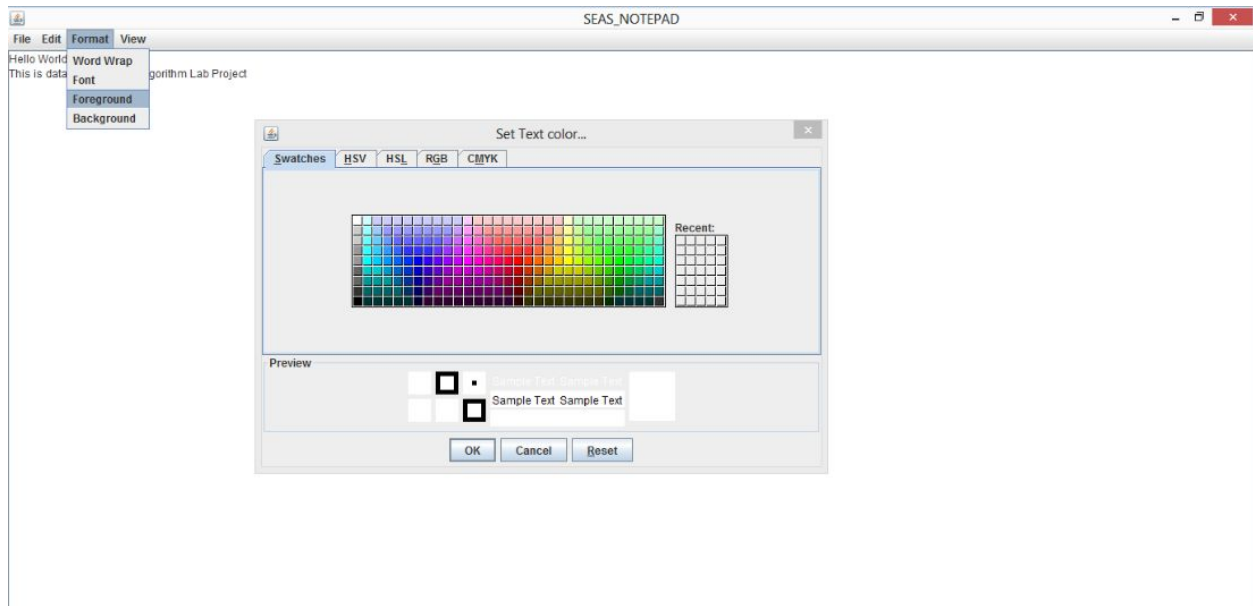

In case of no text is not found into textarea new error window is appear. Here “Madam” is not in our textarea.

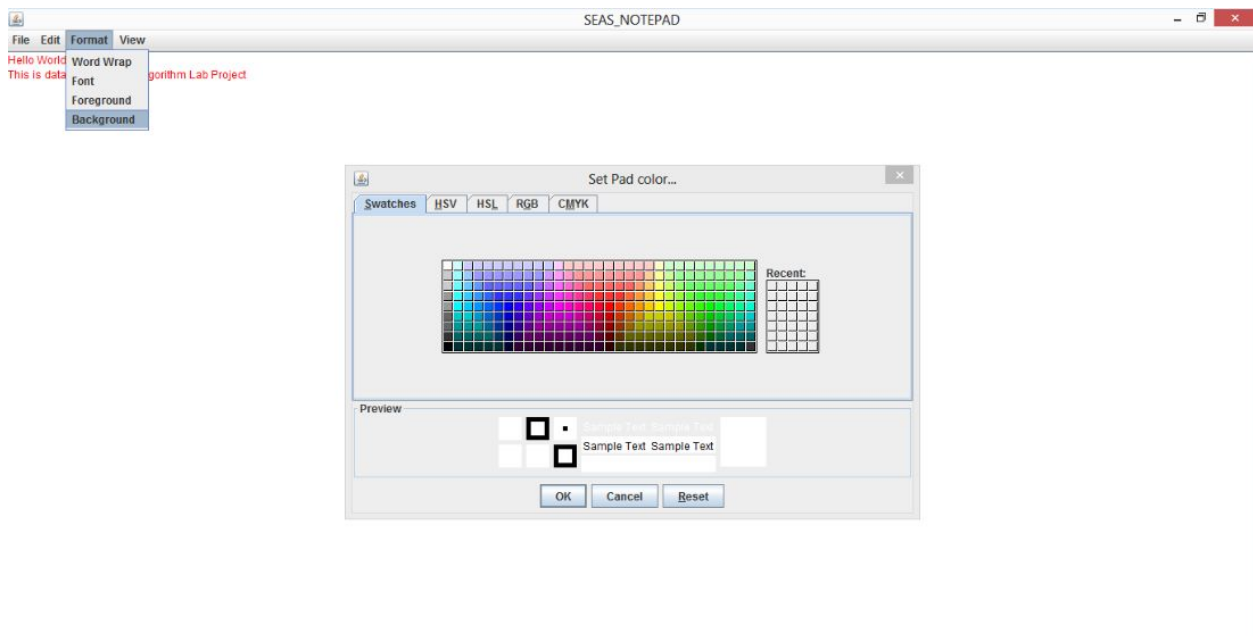

## 11. Format Menu :

**12. Foreground :** After doing foreground operation new window is appear “Set Text color...”.

**13. Background :** After doing foreground operation new window is appear “Set Pad color...”.

## 14. Scroll Bar :
